Profile

Full-stack software engineer with experience shipping a production SaaS platform that now serves 15 restaurants. I take products from idea to production — building responsive interfaces, scalable backends, and reliable data layers. I value continuous learning, clean and maintainable work, and the professionalism that turns good code into dependable products.

Skills

Languages: PHP, Python, JavaScript, C#, Dart, SQL

Frameworks & Libraries: Laravel, React.js, Next.js, Vue.js, Node.js, Express.js, Django, Tailwind CSS, Flutter

Databases: MySQL, MongoDB

Core CS: OOP, MVC Architecture, RESTful API Design, Data Structures & Algorithms, Secure Coding (JWT, RBAC)

Tools & Practices: Git, GitHub, Apache, Nginx, Postman, Agile/Scrum, JWT Authentication, VPS Deployment

Experience

EatsTek Limited

Full Stack Developer

Oct 2024 - May 2026

Lahore, PK

- Developed a **SaaS-based restaurant kiosk platform** using **PHP Laravel, React.js, MySQL, and Tailwind CSS**, deployed as single-tenant instances across 15 restaurants, each processing 200+ orders daily (6,000+ monthly).
- Built and tested **RESTful APIs** with **JWT authentication and role-based access control**, integrating **third-party delivery platforms** to synchronize menus and incoming orders, and verifying request handling and data flow using **Postman**.
- Designed **MySQL schemas and an admin dashboard** representing core business processes: **catalog, inventory, order analytics, employee permissions, and till management for sales and transaction tracking**.
- Built a **subscription management panel** for billing and feature access across 15 restaurants, and developed the EatsTek **e-commerce platform** with **Airwallex integration for checkout and subscription payments**.
- Applied framework best practices for **security, performance, and dependency injection** following **MVC and OOP principles**, and deployed and maintained **15 production instances on Hostinger VPS servers**.
- Collaborated in an Agile team with **structured code reviews and Git/GitHub workflows**, translating evolving business requirements into implemented features.

UET ACM Chapter

Fellowship — Mobile App Development

Aug 2023 - Oct 2023

Lahore, PK

- Built **QuizHub, a quiz application** with real-time data and user progress backed by **Firebase**.
- Created supporting **REST services** for quiz content and results handling.

Tiers Limited

Web Development Intern

Jun 2023 - Aug 2023

Lahore, PK

- Developed a hotel management application using the **MERN stack** covering bookings, room availability, and billing.
- Implemented **authentication and booking workflows**, followed established **software engineering practices**, and **collaborated via Git**.

Projects

QuizHub - android quiz application | Flutter, Firebase, Node.js

[View on GitHub](#)

- Built a quiz mobile app with **role-based access** for admins, teachers, and students, covering exam creation and scheduling, timed test-taking, automated grading, and result and feedback delivery, using a **Flutter** frontend with a **Node.js** REST backend secured by **JWT authentication**.
- Designed the **data layer** across **MongoDB and Firebase** and executed the project end-to-end with UML-based diagrams, ClickUp task tracking, and Git/GitHub collaboration through structured commits.

Estate Deals - Real Estate Platform | PHP Laravel, Vue.js, Inertia.js, MySQL

[View on GitHub](#)

- Built a **property listing platform** for property discovery, buying, and offer management, with **role-based authentication**

and **secure password recovery** via email verification.

- Created a listings dashboard with **dynamic filtering** (price, beds, baths, area) and a bid management flow that accepts/rejects offers and triggers notifications via the **Laravel Notification system**.

Education

University of Engineering and Technology, Lahore
Bachelor of Science in Computer Science

Nov 2021 - May 2025
Lahore, PK
